Spring House, PA 19477-0273

It is with appreciation for excellence in delivery of service and continual accommodation to ever changing medical training environments that we provide this testimonial for the modules of training and skills testing we have engaged with Pacific Medical Training.

COVID-19 continues to impact society and continues to have severe implications on the medical community, patient care and student training. Our student's in-person training opportunities continue to be limited by guidelines for gathering size making Skills Training for BLS and ACLS very challenging. Adding to the complication is the diverse geographic location of students in our education model when we do not have them together on our campus. These circumstances required creativity in providing our students with compliance training such as BLS and ACLS and we were fortunate to make a connection with Pacific Medical Training who could provide appropriate, convenient, timely, and affordable AHA learning modules and virtual skills testing.

We continue to appreciate the exemplary customer service we have received and the various options provided to our students for their training.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Marc Poulin". The signature is fluid and cursive.
